## Sending SMS

- Simple Bulk SMS API
  - GET Request parameters
  - API Responses
  - Notes when using our service
- Handling Delivery Reports
- Code Examples for sending SMS

## Handling Incoming SMS

- Configuring

## The Text Marketer Email-to-SMS

### Gateway

- Quick Start Guide
- A Longer Explanation - Basic use
- Advanced Use
- What if it does not work - Errors

## Simple Connectivity with Wrappers

- The PHP wrapper library
  - A Few Simple Uses - PHP
  - Basics - including the wrapper library - PHP
  - Basics - testing with the sandbox - PHP
  - Wrapper Functions - PHP
    - addGroup - PHP
    - addNumbersToGroupWithName
    - createSubAccount
    - getCredits
    - getDeliveryReport
    - getDeliveryReports
    - getGroup
    - getGroups
    - getKeywordAvailability
    - getLastErrors
    - isLoginValid
    - sendSMS
    - deleteSMS
    - transferCreditsToAccount
    - transferCreditsToUser
  - Handling errors - PHP
- The Java wrapper library
  - A few Simple Uses - Java
  - Basics - including the wrapper library - Java
  - Basics - testing with the sandbox - Java
  - Wrapper Functions - Java
    - addGroup - Java
    - addNumbersToGroup - Java
    - createSubAccount - Java
    - getCredits - Java
    - getDeliveryReport - Java
    - getDeliveryReports - Java
    - getGroup - Java
    - getGroups - Java
    - getLastErrors - Java
    - isLoginValid - Java
    - sendSMS - Java
    - deleteSMS - Java
    - transferCreditsToAccount - Java
    - transferCreditsToUser - Java
    - getKeyword - Java
  - Handling errors - Java

## API Documentation

- Beginners Guide
- Quick Start Reference Sheet
- Advanced Use Guide
  - Resources in detail
    - The sms resource
      - sms DELETE method
      - sms POST method
    - The credits resource
      - credits GET method
      - credits POST method
    - The deliveryReport resource
      - deliveryReport GET method
    - The deliveryReports resource
      - deliveryReports GET method
    - The group resource
      - group GET method
      - group POST method
      - group PUT method
    - The groups resource
      - groups GET method
    - The keywords resource
      - keywords GET method
    - The account resource
      - account GET method
      - account POST method
      - account PUT method
  - Response from the API
    - Response body - successful requests
    - Response body - errors
  - Authentication
  - Testing with the Sandbox
  - Structure of the resource URLs
  - RESTful API code examples
  - Fully-validated XML and DTDs

- The C# wrapper library
  - A few Simple Uses - C#
  - Basics - including the wrapper library C#
  - Basics - testing with the sandbox C#
  - Wrapper Functions C#
    - addGroup - C#
    - addNumbersToGroup - C#
    - createSubAccount - C#
    - deleteSMS - C#
    - getCredits - C#
    - getDeliveryReport - C#
    - getDeliveryReports - C#
    - getGroup - C#
    - getGroups - C#
    - getKeyword - C#
    - getLastErrors - C#
    - isLoginValid - C#
    - sendSMS - C#
    - transferCreditsToAccount - C#
    - transferCreditsToUser - C#
  - Handling errors C#
- What is a sent message?
- General error codes
