

# getKeywordAvailability

Get the availability of a given reply keyword.

A reply keyword allows you receive incoming text messages to your account by providing people with a keyword, which they text to the short code 88802, e.g. text 'INFO' to 88802 to see this in action.

## Example

```
$result = $tmClient->getKeyword('gold');
$available = $result['available'] ? 'is' : 'is not';
$recycled = $result['recycle'] ? 'is' : 'is not';
echo "The keyword 'gold' $available available, and $recycled recycled";
```

## Arguments:

string **\$name**:

Name of the delivery report to retrieve or 'all' to retrieve all campaign/API report data

## Returns:

an array with two keys: 'available' and 'recycle' e.g. **\$result['available']**

Array key	Value
available	Boolean. Whether this keyword is currently available from Text Marketer.
recycle	Boolean. Whether this keyword has been recycled (previously used).

Specific error codes:

None.

NOTE error code 400 is reported if the keyword name is not specified. See [General error codes](#).
