

transferCreditsToAccount

Transfer credits from one account to another account, using the integer account number to specify the target account.

Example

```
$result = $tmClient->transferCreditsToAccount(3, '1234');  
echo "Transferred 3 credits (leaving {$result['source_credits_after']}), to  
targetusername, which now has {$result['target_credits_after']} credits";
```

Arguments:

integer **\$quantity**: The number of credits to transfer from the source account to the target account.

string **\$targetAccountNumber**: The account number of the account to transfer the credits to (available in the web-based UI)

Returns:

an array with four keys:
'source_credits_before',
'source_credits_after',
'target_credits_before' and
'target_credits_after' e.g.
\$result['source_credits_after']

Array key	Value
source_credits_before	The number of credits on the source account before the transfer.
source_credits_after	The number of credits on the source account after the transfer.
target_credits_before	The number of credits on the target account before the transfer.
target_credits_after	The number of credits on the target account after the transfer.

Specific error codes:

Code	Meaning
0	There are insufficient credits available to transfer the specified quantity, or the specified quantity is not a positive number
1	The target account number specified is not a valid number or username/password combination does not refer to any known account
