transferCreditsToUser

Transfer credits from one account to another account, using the username to specify the target account.

> ### Example
>
> ```
> $result = $tmClient->transferCreditsToUser(3, 'targetusername', 'targetpassword');
> echo "Transfered 3 credits (leaving {$result['source_credits_after']}), to
> targetusername, which now has {$result['target_credits_after']} credits";
> ```

Arguments:

integer **$quantity:**   The number of credits to transfer from the source account to the target account.

string **$target_username:**   The username of the account to transfer the credits to.

string **$target_password:**   The password of the account to transfer the credits to.

Returns:

an array with four keys: 'source_credits_before', 'source_credits_after', 'target_credits_before' and 'target_credits_after' e.g. $result['source_credits_after']

Array Key	Value
source_credits_before	The number of credits on the source account before the transfer.
source_credits_after	The number of credits on the source account after the transfer.
target_credits_before	The number of credits on the target account before the transfer.
target_credits_after	The number of credits on the target account after the transfer.

Specific error codes:

Code	Meaning
0	There are insufficient credits available to transfer the specified quantity, or the specified quantity is not a positive number
1	The target account number specified is not a valid number or username/password combination does not refer to any known account
