transferCreditsToUser - C#

Transfer credits from one account to another account, using the username to specify the target account.

Example

```
Hashtable result = tmClient.transferCreditsToUser(3, "targetusername",
"targetuserpass");
Console.WriteLine("Transfered 3 Credits (have {0} now), to account targetusername,
now with {1} Credits", result["source_credits_after"],
result["target_credits_after"]);
```

Arguments:

int **quantity:**	The number of credits to transfer from the source account to the target account.
String **target_username:**	The username of the account to transfer the credits to.
String **target_password:**	The password of the account to transfer the credits to.

Returns:

A Hashtable with four keys: 'source_credits_before', 'source_credits_after', 'target_credits_before' and 'target_credits_after' e.g. result["source_credits_after"]

Array key	Value
source_credits_before	The number of credits on the source account before the transfer.
source_credits_after	The number of credits on the source account after the transfer.
target_credits_before	The number of credits on the target account before the transfer.
target_credits_after	The number of credits on the target account after the transfer.

Specific error codes:

Code	Meaning
0	There are insufficient credits available to transfer the specified quantity, or the specified quantity is not a positive number
1	The target account number specified is not a valid number or username/password combination does not refer to any known account
